## Notice of correction regarding Resolute Forest Products' operations

**19 March 2013** - On 6 December 2012, Greenpeace Canada made statements regarding Resolute Forest Products which incorrectly stated that Resolute had breached the Canadian Boreal Forest Agreement by approving and developing roads in “areas of suspended harvest” and that Resolute was secretly engaged in logging, contrary to the terms of the Canadian Boreal Forest Agreement. These statements were repeated and republished in subsequent publications.

Greenpeace has learned that the above-mentioned statements are incorrect and has removed any reference to the statements from all its materials. Greenpeace sincerely regrets its error.

Greenpeace has a 40 year history of campaigns based in the best available science and research and takes this issue very seriously.

Greenpeace Canada will continue to campaign for the protection of the Boreal Forest and advocate for solutions that benefit the forest, communities and workers.
