Greenpeace Canada reaction to Pan-Canadian Framework on Clean Growth and Climate Change

December 9, 2016 (Montreal) - In response to the announcement of a Pan-Canadian Framework on Clean Growth and Climate Change, the Head of Greenpeace Canada's climate change campaign Keith Stewart said:

"Honouring our Paris climate commitment means moving to a 100 percent renewable energy economy by mid-century. Parts of the framework announced today point in the right direction, but we won't free ourselves from fossil fuels fast enough to avoid dangerous levels of warming if we allow oil companies to build new tar sands pipelines and liquefied natural gas export facilities that lock us into high levels of carbon pollution for the next 50 years."
