

GTZ Proklima, Greenpeace China and Refrigerants, Naturally! at the China Refrigeration Expo

China Refrigeration Expo, April 9 – 11, 2008
Shanghai, China

Booth Number T1A18
Seminar Room 8, 10 April, 13:30 -16:00h

Beijing, 10th March 2008

Dear Ladies and Gentlemen,

We would like to take this opportunity to invite you to our exhibition booth and public seminar at the China Refrigeration Expo (CRE).

GTZ Proklima, a programme of the Gesellschaft für Technische Zusammenarbeit (GTZ, German Technical Cooperation), Greenpeace China and the Refrigerants, Naturally! Initiative (a global initiative of companies committed to combat climate change and ozone layer depletion by substituting harmful HFCs with natural refrigerants in their point-of-sale cooling applications) will be represented at the 19th International Exhibition for Refrigeration, Air-conditioning, Heating and Ventilation, Frozen Food Processing, Packaging and Storage (China Refrigeration Expo) from 9 - 11 April 2008 in Shanghai, China. The CRE is recognized as one of the leading HVAC&R exhibitions in the world. It is frequented by major refrigeration and air conditioning equipment manufactures, end-users, as well as policy-makers and other stakeholders in the field.

These three organizations are working together to demonstrate that natural refrigerants are sustainable, energy efficient and ozone- and climate-friendly alternatives to HCFCs, which should gain preference over HFCs. The partners can be met at our exhibition booth, where various applications of natural refrigerants will be showcased. The equipment is available now in China and elsewhere, and companies are testing it with a focus on large scale implementation when technology is proven to be available, cost effective and reliable. We look forward to welcome you at our booth (number T1A18) during the exhibition days.

The three partners will also hold a public seminar about “Using Natural Refrigerants—Lessons China can draw from Europe” to which all interested persons are cordially invited. A frank and open discussion with the audience will be followed by each presentation.

Speakers at the seminar will be:

- Alice Liping Fan of Greenpeace China about “Environmental advantages of natural refrigerants”,
- Dr. Daniel Colbourne, refrigeration expert from GTZ Proklima, about “Natural refrigerant use in various equipment”,
- Dr. Winfried Schwarz, policy advisor for the European Union and German government, about “Legislative changes that promote natural refrigerants”,
- Prof Wang Ruzhu, Shanghai Jiao Tong University about “Perspectives for natural working fluids in China”,
- Wei Xu., Unilever, a representative of the Refrigerants, Naturally! Initiative about “End-user motivations, achievements and cost-aspects of using natural refrigerants”, and
- Mr. John Lange, the Sales and Marketing V.P. from Embraco(compressor manufacturer) and Mr. Liu Yingzhi, Vice-general Manager, Global Commercial Freezer Center, Freezer R & D Department from Haier (appliance manufacturer) about “Experiences on converting to natural refrigerants from a manufacturer’s perspective”.

Please **complete attached registration form to confirm attendance** at the seminar by **March 28** so that we can make sure to book a seat for you and prepare seminar materials for your convenience.
