Statutory Administration Report

From bright orange survival suits to dark grey business suits; from scuba gear to climbing harnesses; from chicken suits to lawsuits: Greenpeace activists take on many guises. We are lawyers, doctors, scientists, engineers, sailors, journalists, lobbyists, researchers, fundraisers, webies, climbers, boat drivers and above all activists united by a common dream. A dream of a green and peaceful future.

You can find us in the high street, in the courtroom, on the internet, in the newspapers and on TV. We work at the frontiers from defending the whales in the freezing waters of the Southern Ocean to protecting the trees in the Finnish forests in Northern Lapland; from negotiating treaties in the corridors of the United Nations in New York to promoting corporate responsibility in company board rooms.

The Board of Directors and the Executive Director hereby present the following annual report. Figures are in thousands of Swedish Crowns (KSEK) if nothing else is stated.

GLOBAL ENVIRONMENTAL ORGANISATION

Core Values and Principles

Greenpeace is a global campaigning organisation that acts to change attitudes and behaviour, to protect and conserve the environment and to promote peace by:

- investigating, exposing and confronting environmental abuse,
- challenging the political and economic power of those who can affect change,
- driving environmentally responsible and socially just solutions that offer hope for this and future generations
- inspiring people to take responsibility for the planet.

We promote open, informed debate about society's environmental choices. We use research, lobbying, and quiet diplomacy to pursue our goals, as well as high-profile, non-violent conflict to raise the level and quality of public debate. We ensure our financial independence from political or commercial interests.

In developing our campaign strategies and policies we take great care to reflect our fundamental respect for democratic principles and to seek solutions that will promote global social equity.

Financial and Decision Making Structure

Greenpeace comprises 28 independent national/regional offices in over 40 countries across Europe, the Americas, Africa, Asia and the Pacific, as well as a coordinating body in Amsterdam, Greenpeace International.

Greenpeace's funding structure is designed to reflect our aim to be "One Greenpeace": a truly global organisation, since environmental issues and their solutions do not stick to national borders. Each self sufficient Greenpeace office pays pledge to the international organisation in order to finance environmental work where it is needed the most. The global strategy of Greenpeace is decided jointly at a global level with input from national and regional offices.

Greenpeace Relies on Individuals all over the World

To maintain its independence, Greenpeace does not accept donations from governments or corporations but relies on contributions from individual supporters and foundation grants.

Greenpeace has 2.9 million donors worldwide, and many more support us by taking action every day.

Global Priorities 2008

Greenpeace works on the following campaigns:

- Catalysing an energy revolution** - to address the number one threat facing our planet: climate change.
- Defending our oceans** - by challenging wasteful and destructive fishing, and creating a global network of marine reserves.
- Protecting the world's remaining ancient forests** - and the animals, plants and people that depend on them.
- Working for disarmament and peace** - by tackling the causes of conflict and calling for the elimination of all nuclear weapons.
- Creating a toxic free future** - with safer alternatives to hazardous chemicals in today's products and manufacturing.
- Campaigning for sustainable agriculture** - by rejecting genetically engineered organisms, protecting biodiversity and encouraging socially and ecologically responsible farming.

GREENPEACE NORDIC

Greenpeace Nordic is part of the global organisation. We are a non-governmental, non-profit organisation with offices in Stockholm, Helsinki, Copenhagen and Oslo. The organisation is Swedish registered.

Decisions regarding the Annual Report, indemnity for the Board of Directors etc are taken by the voting members at the Annual General Meeting (AGM). The members of the Board of Directors are elected by the AGM.

The members of the Board of Directors, as well as the voting members, fulfil their duties without any form of remuneration. The day-to-day operations are carried out by an organisation, spread over four Nordic countries, headed by the Executive Director.

Governance

The Board of Directors of Greenpeace Nordic consisted of seven members during 2008, Arni Finnson (Iceland), Jörgen Gjerdrum (Norway), Rune Leithe (Sweden), Ulf Månsson (Finland), Irmi Mussack (Germany), Kirsten Sander (Denmark) and Marianne Wanger (Sweden). Irmi Mussack was the Chair of the Board of Directors.

Irmi Mussack was elected a member of the board of Greenpeace International at the international Annual General Meeting in March 2009. Kirsten Sander, being the Deputy Chair, then took over as Chair of the Board of Greenpeace Nordic until the Nordic AGM to be held in Stockholm at the end of April. Kirsten Sander also replaced Irmi Mussack as the trustee, representing Greenpeace Nordic at the international Annual General Meeting.

Our Executive Director Lennart Daléus retired in August 2008. He was replaced by Mads Flarup Christensen. Mads has been working for Greenpeace since 1992, most recently as Programme Director.

Operations 2008

Greenpeace Nordic was, as always, an active and contributing part in dealing with all the issues that are prioritised by the global Greenpeace.

Greenpeace continued to promote positive solutions to curb climate emissions, as well as stopping dangerous energy technologies. In our Energy [R]evolution energy scenario we outlined both the global and local energy pathways toward solving the climate crisis. We produced a 30 minutes documentary "Future starts here" on energy solutions available in the Nordic area. Our campaigners created happenings and networked with companies and municipalities producing positive climate solutions.

We continued our effort to push big energy companies in Nordic such as Vattenfall, Dong and Statoil to shift their investments away from fossil fuels like coal and tar sands. Greenpeace activists performed two high profile coal activities in Denmark, highlighting the insanity of expansion of coal use, at a time when Nordic needs to become fossil fuel free, as soon as possible.

Greenpeace Nordic was also working inside the international climate negotiations, during the year, in Accra in Ghana and Poznan in Poland, pushing the governments to ensure that we will have an effective climate deal at the Cop-15 meeting in Copenhagen in December 2009.

Greenpeace was instrumental in revealing yet another safety scandal in Olkiluoto nuclear reactor construction site, where workers informed public about construction companies overlooking safety and quality measures. This put into question not only the safety mechanisms of the construction but the reactor itself, when weldings were made without proper guidance. The reactor project is already 2.5 years behind schedule and at least €1.7 billion over budget.

Greenpeace pressured Finnish oil company Neste over its palm oil use in biodiesel. We documented and exposed Neste's palm oil supplier IOI in action clear cutting Borneo rainforests to expand oil palm plantations. After getting several Swedish customers of Neste to turn down palm oil diesel, we are now pushing Finnish companies to stop using Neste's diesel of palm oil.

Another active part of our work was our Oceans campaign. A high profile campaign targeting retailers and informing the public about the need to avoid unsustainable sea food gave clear campaign results –a number of retailers in Sweden, Norway and Denmark removed red-listed products from their shelves. Contact with retailers created a foundation for future cooperation on addressing globally relevant problems, such as tuna fisheries in the Pacific and Mediterranean etc.

Some key steps were taken on the path towards the creation of marine reserves as well. Greenpeace carried out a highly publicized action in the Natura 2000 area on Sylt Outer Reef in the North Sea, where we placed a large number of fishing obstacles to stop destructive bottom trawling that threatened natural values of the area. The project caused a great deal of controversy and helped to raise public debate on the need to create a network of marine reserves and implement EU legislation for protection of the seas.

Political, media and action work was begun for creating marine reserves in the Norwegian Sea. To protect the largest known cold water areas in the world from destructive effects of fishing and oil production, we created a spatial management plan.

On toxics our long time work with electronics companies bare fruit. Apple announced several new Ipod and laptop models free from toxics like BFR and PVC. Overall the big electronics manufacturers are on their way of implementing phase out of toxic chemicals in their products, saving toxic pollution throughout the life-time of the product.

Public Image and Outreach

A Nordic wide opinion poll, commissioned by us in April 2007, confirmed by additional polls in 2008, showed very clearly that environmental concern again tops the list of concerns among citizens and that climate change is considered the most urgent threat to our civilization.

Greenpeace has been campaigning on climate change in the Nordic region for over 10 years. We are very happy to see this change in attitude and increased awareness. The opinion poll also confirmed that Greenpeace is seen as the nr.1 opinion leader on environmental issues in Sweden, Denmark and Finland and that we by far remain the environmental organisation with the highest brand recognition in the Nordic region. Talented web editors and photographers are working hard in order to improve and continuously update our most important tool for communicating our messages.

Greenpeace was the first organisation in the Nordic region to reach out to people by knocking on doors. Talking to people in their homes as well as talking to people in the streets, has turned out to be a very efficient way of meeting potential supporters and spreading our messages. The face-to-face contact with representatives of Greenpeace allows time to ask questions, discuss and get more personal feedback on our work.

Greenpeace Nordic also started a new volunteer programme, aiming at creating new possibilities for volunteers to work with our campaigns. This is a response to our supporters and volunteers who want to help us more. At the same time it also is a tool to get larger groups active in environmental debate in our Nordic societies.

Donors

The number of donors increased by 8.6% during 2008, thereby reaching almost 150 000 by the end of the year, the highest number since 1995 and the highest ever in Finland.

Number of Donors

	2008-12-31		2007-12-31
Sweden	100 122	8,8 %	92 045
Denmark	20 747	10,6 %	18 757
Norway	1 539	-6,2 %	1 640
Finland	26 275	7,2 %	24 505
Total	148 683	8,6 %	136 947

Greenpeace is endlessly grateful to the nearly 150 000 dedicated donors in the Nordic area and to the activists standing in the frontline.

We are confident that Greenpeace will remain one of the most important driving forces in creating a world in ecological balance. We will need continued broad support now more than ever. Greenpeace is only as strong as the people who support us.

Financial Position and Performance

Stable Growth

Greenpeace Nordic became beneficiary of "Svenska PostkodLotteriet" in 2008 and received 10 MSEK. In December the first share of 5 MSEK was paid out. The remaining 5 MSEK was paid out in March.2009. Money Greenpeace receives from the lottery will be used for Greenpeace work in developing regions such as Africa and Asia, in order to increase Greenpeace ability to achieve results in those regions.

Greenpeace Nordic has for the last couple of years shown a steady growth both in income and donor numbers. The high degree of direct debit donations (94%) gives a sound and stable financial situation.

The organisation does not take on any new obligations or enters new situations without strictly evaluating the risks at hand.

Greenpeace does not invest in shares or other financial instruments. Thereby the financial crisis has not affected the financial situation in 2008.

This year's surplus is a result of unexpectedly high legacy income. The surplus is welcome for future resource demanding work.

Income

Income increased by 28 714 (33.7% to 114 001. Income that has come in over the Swedish 90-accounts was close to 77 MSEK. The 2008 income includes support to Greenpeace Russia amounting to 4 079, and 10 000 from the Postcode Lottery.

	2008	Variance	2007
Income	114 001	33,7%	85 287
Out of which:			
Donations	92 961	15,0%	80 813

ACCOUNTING PRACTICES AND POLICES

The Annual Report has been prepared in accordance with the Annual Accounts Act and the guidelines issued by the Swedish Accounting Standards Board. If no guidelines have been issued by the Swedish Accounting Standards Board, guidance has been taken from the standards issued by the Financial Accounting Standard Council.

Accounting practices and policies are the same as previous years.

Income

The Association's income consists of supporter fees, donations, bequest and from 2008 also income from the Swedish Postcode Lottery. Income is shown as the real value of what has been received or will be received. Income in the form of gifts is booked as income during the period the gift was handed over in a legally binding way,

Receivables

Receivables are valued individually and booked to the amount with which they are estimated to be received.

Receivables and Payables in Foreign Currencies

Receivables and payables in foreign currencies are recalculated to the exchange rate at closing day in accordance with the Financial Accounting Standard Council recommendation no.8. Exchange rate differences on receivables and liabilities relating to operations are included in the operational result, whereas exchange rate differences relating to financial items are included in the financial items.

Prepaid expenditure in foreign currencies is valued at the exchange rate at the time for payment.

Expenditure

Expenditure is recognized in the period in which incurred.

Costs for Campaigns include salaries for campaigners, operations and maintenance of action equipment. Campaign costs also include contributions to Greenpeace Russia and to Greenpeace International.

Fundraising expenditure includes salaries to staff, costs for recruiting new supporters and other costs to maintain and upgrade our supporter income.

Administration costs include staff and system costs for supporting the organisation. Indirect cost such as office rent and other cost for running the offices is together with administration and depreciation distributed over campaigns, fundraising and administration on a head count basis.

Tax

Greenpeace applies the Swedish Accounting Standards Board guidelines concerning reporting of income tax, BFNAR 2001:1. Total tax consists of current tax and deferred tax. Current tax is tax which should be paid or received concerning the current fiscal year. Included in current taxes are also adjustments of current tax from previous periods. Deferred tax is calculated according to the balance sheet method considering temporary differences between accounting and tax regulations on assets and liabilities.

Intangible Assets

The costs for developing a new supporter database have been capitalized. Depreciation started June 2007. Depreciation will be linear over ten years, the estimated lifetime.

Tangible Assets

Tangible Assets are valued at purchase price and depreciated evenly over the expected useful life, a period of three years for computers and office equipment, and three to five years for furniture, cars, boats and other action equipment.

Financial Investments

Greenpeace Nordic does not invest in shares or securities. For the purpose of receiving information and to be able to attend shareholder meetings, the organisation holds least possible number of shares in some forest and chemical companies. Furthermore Greenpeace Nordic owns shares in a Danish windmill coop.

Shares and securities inherited or received as donations are sold as soon as possible.

Provisions for legal disputes

A provision for legal disputes is made in accordance with the Swedish Financial Accounting Standards Council, RR 16. Liabilities, including legal disputes, are provided for in full when the amount can be assessed with reasonable certainty.
