

RESEARCH THE DEEP

Welcome, Explorer! Take a deep breath and imagine diving into the coldest, darkest, and most mysterious ocean on Earth. We know more about the surface of the Moon than the deep sea yet, the deep sea makes up 90% of our oceans! Let's do some research to learn how important our oceans are and what threatens them.

AN EXISTING THREAT: CLIMATE CHANGE

How does climate change impact the ocean zones? How does it impact the deep sea? What are some solutions?

A POTENTIAL THREAT: DEEP SEA MINING

What is deep-sea mining? How might it impact marine life?

A large, light blue rounded rectangular area intended for writing an answer to the question about deep-sea mining.

ANOTHER THREAT: _____

Research your own threat and what can be done to help.

A large, light blue rounded rectangular area intended for writing an answer to the question about another threat.
