

# TAKING ACTION FOR THE DEEP SEA

The Arctic floor is home to "underwater forests" made of deep-sea sponges and corals. These are called Vulnerable Marine Ecosystems (VMEs) because the animals there grow very slowly and can live for hundreds of years. We know more about the surface of the Moon than the deep sea yet, the deep sea makes up 90% of our oceans! The more we learn, the more we can protect. Let's keep learning together!

I will help by \_\_\_\_\_

I will share \_\_\_\_\_

I want to protect the Deep Arctic because...
