

Nordic Volunteer Activities 2022

GREENPEACE

2022

Last year for Greenpeace Nordic, was centred around the tragic Russian invasion of Ukraine that started on the 24th of February, 2022'. We were thrown from trying to find a new normal in our operations and activities after covid to utilising all of our resources in fighting against the continued Nordic import of fossil fuels from Russia; an import that not only fuels the climate crises, but also funds Putin's war on Ukraine.

So, while 2022 will go down in the history books as the year there was once again war in Europe, we'll also look back at it as the year the Nordic volunteer and action community truly wiped the dust off our gear and got back into action.

In total, our community did an amazing 201 activities, with 52 of these activities being Direct Actions and Direct Communications. In Direct Actions alone, the Nordic volunteers put in more than 3,500 volunteer hours, showing the importance and the huge impact of the Nordic volunteer and activist network.

In addition to Direct Actions, one of the most successful campaigns last year was the Volunteer Led campaign: Fossil Ad Ban. There were more than 50 activities connected to this campaign culminating in a win at the year's end for the Stockholm volunteer group when Stockholm's municipality decided to ban fossil advertisement!

As we move further into 2023, we are confident that volunteers and activists will make an even greater impact through their engagement with Greenpeace Nordic; through Nonviolent Direct Actions and all of the other amazing skills and energy they bring to the organisation.

On behalf of the Nordic Volunteer and Action Units,
Sven Malmgren

About the report

This report is made to show the activity of the Nordic Volunteer community in 2022. In the report you will find pictures, numbers, maps and graphs summarising the year in the Nordic, and then more detailed information for each Nordic country.

Following the country pages you find more information about the two biggest campaigns for the Volunteer community this year - the Stop Fuelling War campaign and the volunteer led campaign of the year - Fossil Ad Ban. In the end you find two pages summarising the skill based teams activities.

The report is based on numbers of external activities, which means that internal meetings and trainings are not counted in the activity numbers or volunteer hours. The numbers of new volunteers and total number of volunteers are based on members of the volunteer platform Greenpeace Community.

Activities

In 2022 the Greenpeace Nordic volunteers arranged or contributed to a total of 201 activities. The activities took place in the 35 locations shown on the map, as well as online.

 Locations where activities took place

Local groups

In 2022 Greenpeace Nordic had 16 local volunteer groups. The main differences compared to last year are the start up of a new local group in Umeå, Sweden and that the local group in Oulu, Finland is no longer active.

The volunteer led campaign of 2022 was to ban fossil advertisement, a continued campaign from 2021. In the campaign the volunteer groups worked with getting cities and other stakeholders to put an end to advertising for climate disruption.

In addition to working towards local goals the volunteers have been collecting signatures for the European Citizen Initiative that ended in October with 36 000 signatures from the Nordic countries, and 350 000 signatures in Europe. Unfortunately we didn't reach the needed goal for the initiative to be taken forward, but it has still created a lot of attention and impacts in Europe.

Throughout the year there has been a total of 52 activities in the campaign, with the main part being Direct Communication activities and being present at events like festivals to collect signatures.

At the end of the year, the local group in Stockholm had a wonderful victory by securing the municipal governance of Stockholm to commit to a fossil ad ban!

Stop fuelling war

22

activities

3580

volunteer hours

When Ukraine was invaded by Russian forces, it became clear that the fossil fuel exports from Russia are directly fuelling/enabling the Russian war machine. The clear connection to peace and climate change provided an even stronger reason to free ourselves from our dependency on fossil fuels.

Greenpeace started to pressure the Nordic Governments to end this fossil fuel addiction once and for all, and as a first step, reject and ban all import of fossil fuels from Russia.

The import of Russian fossil fuels to the Nordic countries still continued, and as a reaction Greenpeace Nordic started taking action against the import - and did in total no less than 14 Nonviolent Direct Actions and 6 peace vigils and demonstrations spread over the four Nordic countries, both on land and at sea!

Skill based teams

1

boat team

4

climbing
teams

4

greenspeaker
groups

4

kayak teams

In 2022 trainings and practice weekends were arranged in the skill based teams, as well as more general trainings in Civil Disobedience and NVDA.

The skill based teams that are active in the Nordic are the Boat team, that is one team on a Nordic level; and the climbing, kayak and Greenspeakers teams, organised with one team in each country.
